

New York Blower is a company with a long history of success. Spanning the decades from 1889, we have experienced remarkable growth and have played an active role in leading the entire air-movement industry forward. We are committed to total customer satisfaction through continuous improvements to our product offering.

1889 - 1904
Mathis Brothers Company is founded by JW and August Mathis.

Manufacturing in Chicago, IL operates from 1889 - 1980

Manufacturing Plant in Bucyrus, OH operates from 1893 - 1919

1939 - 2017
The Mathis Brothers Company is reactivated as Mechanovent Corporation, a subsidiary originally used to sell unit ventilators mainly to schools.

Manufacturing Plant in LaPorte, IN opens in 1919

1987 - 2002
Barron Industries, a company strong in the service side of the fan industry, is acquired. Its products included fans, dust collectors, dampers, air locks, and fan repair/rebuild.

Manufacturing Plant in Effingham, IL opens in 2002

2003 - 2013
TLT Babcock, Inc. specializes in custom engineered blowers specific to electric power generation and pollution control systems.

Corporate Headquarters in Willowbrook, IL opens in 1981

2009 - 2018
MAS Air further expanded the nyb product offering, specializing in high temperature fan applications and mechanical draft fans for heavy process industrial applications. Their facility in New Castle, PA becomes the fourth nyb production facility located in the United States.

Manufacturing Plant in New Castle, PA opens in 2009

2014 - 2015
J.P. America is acquired by nyb in 2014 and incorporated into the nyb product line in 2015. As a global manufacturer of silencers, dampers, flexible connectors, rainhoods, and sound enclosures, the acquisition allows expedited service of these products to nyb customers.

Manufacturing Plant in Leitchfield, KY opens in 2013

2014 - Current
In 2014, nyb partnered with its long standing licensee in New Zealand. Windsor Engineering Group PTY LTD is an engineering and manufacturing firm that specializes in fans for the dairy and lumber industries.

2016 - Current
Aerotech was acquired to expand international manufacturing. Located in Melbourne Australia, Aerotech fabricates both centrifugal and axial fans. Serving a variety of industries including cement, pulp and paper, chemical, pharmaceutical, oven and burner, oil gas, and pollution control, they have expertise in aerodynamics, rotor dynamics, acoustics, and stress and vibration analysis.

The New York Blower Company, a fan manufacturer founded in 1893, is purchased by the Mathis Brothers Company, a Chicago sheet metal contractor and purveyor of pneumatic tube systems. Original product offerings included heavy-duty fans, steam engines, and ductwork.

1904 - Current

CECO was purchased in 1972 to build gas make up air units.

1972 - 1984

As a Canadian subsidiary of TLT-Babcock, Inc., TLT-Covent provided Heavy Duty Industrial Centrifugal Fans for the process industries worldwide.

2003 - 2009

Alphair added to nyb's process fan portfolio with their heavy-duty axial and ventrifugal fan lines, mostly sold to industrial sectors like mining, pulp and paper, utilities, power generation, cement, steel, and petrochemical production.

2008 - 2013

In 2012, nyb partnered with its longstanding licensee in Singapore. Air Trade Systems, LTD is a manufacturer of heavy duty fans focusing on the marine industries.

2012 - Current

nyb acquired HDA Fans Inc. to further expand high temperature offerings including axial fans, plug fans, and fan wheels.

2014 - 2015

AirEng is acquired to help focus on customized centrifugal and axial fans. With headquarters in Australia, they help expand nyb's global presence.

2015 - Current

A minority stake in KDS Windsor was purchased by nyb in 2018 with a full acquisition being completed in 2022. Located in Hendersonville, NC, KDS manufactures industry leading lumber drying kilns and also aids nyb through strengthened aftermarket services.

2018 - Current
